INTRODUCTION

The purpose of this guide is to show how easy it is to gain access to the engine compartment.

Applicable Models

- All 987 models

TOOLS:

- [Panel Removal Tool Kit](#) (1)
 - [Torx T-Handle Set](#) (1)
-

Step 1 — Start with the Passenger-Side Corner

- Using a plastic pry tool, start on the passenger side area.
- Slip pry tool between plastic trim and carpet
- lift gently and be cautious not to scratch the trim.

Step 2 — Repeat the Operation on the Driver-Side Corner.

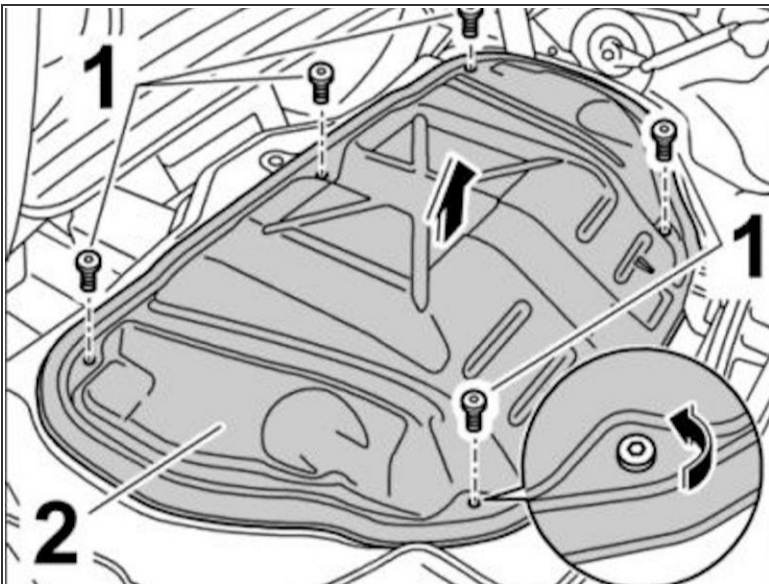

- Repeat this step on the driver-side corner.
- Lift the corner of the carpeted engine cover.

Step 3 — Lift the Entire Front Edge of the Carpeted Cover

- With all the 2 corners released, we can now lift the whole front edge of the carpeted cover. The metallic engine cover is partially visible.
- Remove the cover via the trunk.

Step 4 — Removal of the Metallic Cover

- The metallic engine cover is now fully visible. There are 5 screws to remove with the 4 mm Torx driver (red circles).

Step 5 — Clean up and inspect

- Now is a great time to clean up all the dust in the engine bay and inspect for any fluid leaks.
