TOOLS:

- [Torx Socket Set](#) (1)
- [3/8" Ratchet](#) (1)
- [3/8" Extension Set](#) (1)
- [Nitrile Disposable Gloves](#) (1)

Step 1 — Porsche 911 997 Rear Bumper Removal

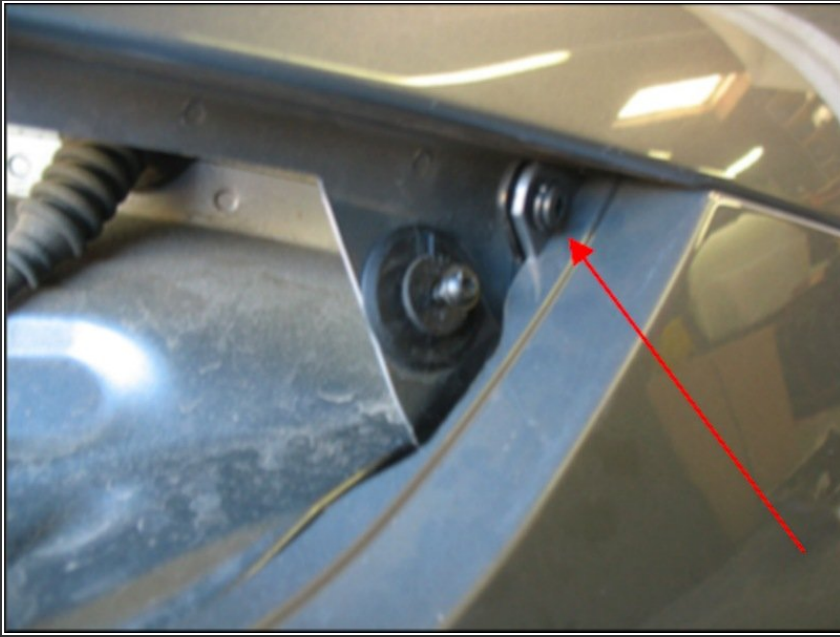

- Open Trunk
- Loosen Torx Screws

Step 2

- Remove Tail Light and disconnect electrical connections

Step 3

- In the far corner is a small fastener securing a tab on the bumper to the quarter panel, remove.

Step 4

- From underneath remove the screw that secures the tip of the bumper to the quarter panel.

Step 5

- You can now pull the sides of the bumper away from the quarter panel.

Step 6

- From underneath remove the 2 screws holding the very bottom edge of the bumper.

Step 7

- From underneath, by the muffler, remove the 2 bolts holding the bottom center in place.

Step 8

- Carefully slide the rear bumper cover off of the car.
